Volume 186 1989

Table of contents

No. 1–2 1–426 issued on December 8, 1989
No. 3 427–762 issued on December 22, 1989

Corrections 755

Claude Liébecq. An appreciation
S. Prakash Datta 427–428

Nomenclature of initiation, elongation and termination factors for translation in eukaryotes. Recommendations 1988
Nomenclature Committee of the International Union of Biochemistry (NC-IUB) 1–3

The Nomenclature of steroids. Recommendations 1989
IUPAC-IUB Joint Commission on Biochemical Nomenclature (JCBN) 429–458

Lecture

Engineering of protein bound iron-sulfur clusters — A tool for the study of protein and cluster chemistry and mechanism of iron-sulfur enzymes
H. Beinert and M. C. Kennedy 5–15

Nucleic acids, protein synthesis and molecular genetics

The cDNA structure and expression analysis of the genes for the cysteine proteinase inhibitor cystatin C and for β_2-microglobulin in rat brain
T. Cole, P. W. Dickson, F. Esnard, S. Averill, G. P. Risbridger, F. Gauthier and G. Schreiber 35–42

Efficient tissue-specific expression of bovine α-lactalbumin in transgenic mice
J.-L. Vilotte, S. Soulier, M.-G. Stinnakre, M. Massoud and J.-C. Mercier 43–48

Analysis of magnesium, europium and lead binding sites in methionine initiator and elongator tRNAs by specific metal-ion-induced cleavages
J. Ciesiołka, J. Wrzesinski, P. Górnicki, J. Podkowiński and W. J. Krzyzosiak 71–77

Regulation of cytosolic aspartate aminotransferase mRNAs in the Fao rat hepatoma cell line by dexamethasone, insulin and cyclic AMP
R. Barouki, M. Pavé-Preux, B. Bousquet-Lemercier, S. Pol, J. Bouguet and J. Hanoune 79–85

The synthesis and functional evaluation of RNA and DNA polymers having the sequence of *Escherichia coli* $tRNA^{fMet}$
J.-P. Perreault, R. T. Pon, M. Jiang, N. Usman, J. Pika, K. K. Ogilvie and R. Cedergren 87–93

ADP-ribosylation of the 78-kDa glucose-regulated protein during nutritional stress
G. H. Leno and B. E. Ledford 205–211

Sequence analysis of the peptide-elongation factor EF-2 gene, downstream from those of ribosomal proteins H-S12 and H-S7, from the archaebacterial extreme halophile, *Halobacterium halobium*
T. Itoh 213–219

Secondary structure of 7SK and 7-2 small RNAs — Possible origin of some 7SK pseudogenes from cDNA formed through self-priming by 7SK RNA
D. Suh, Y. Yuan, D. Henning and R. Reddy 221–226

Expression and processing of cyanobacterial Mn-stabilizing protein in *Escherichia coli*
T. Kuwabara, R. Nagata and K. Shinohara 227–232

Cloning and sequencing of the gene coding for aspartate aminotransferase from the thermoacidophilic archaebacterium *Sulfolobus solfataricus*
M. V. Cubellis, C. Rozzo, G. Nitti, M. I. Arnone, G. Marino and G. Sannia 375–381

Structure of sea-urchin arylsulfatase gene
K. Yamada, K. Akasaka and H. Shimada 405–410

Frameshifting in the synthesis of *Escherichia coli* polypeptide chain release factor two on eukaryotic ribosomes
J. M. Williams, B. C. Donly, C. M. Brown, F. M. Adamski, C. N. A. Trotman and W. P. Tate 515–521

Purification of active human plasminogen activator inhibitor 1 from *Escherichia coli* — Comparison with natural and recombinant forms purified from eucaryotic cells
D. Lawrence, L. Strandberg, T. Grundström and T. Ny 523–533

Arginyl-tRNA synthetase from yeast — Discrimination between 20 amino acids in aminoacylation of $tRNA^{Arg}$-C-C-A and $tRNA^{Arg}$-C-C-A(3'NH_2)
W. Freist, H. Sternbach and F. Cramer 535–541

Restriction of poliovirus RNA translation in a human monocytic cell line
J. A. López-Guerrero, L. Carrasco, F. Martínez-Abarca, M. Fresno and M. A. Alonso 577–582

Protein chemistry and structure

Purification and characterization of five variants of phospholipase A_2 and complete primary structure of the main phospholipase A_2 variant in *Heloderma suspectum* (Gila Monster) venom
F. Gomez, A. Vandermeers, M.-C. Vandermeers-Piret, R. Herzog, J. Rathe, M. Stievenart, J. Winand and J. Christophe 23–33

Conformation of secretin in dimethyl sulfoxide solution — NMR studies and restrained molecular dynamics
M. Hofmann, D. Gondol, G. Bovermann and M. Nilges 95–103

Pike eel (*Muraenesox cinereus*) gonadotropin — Amino acid sequences of both α and β subunits
C.-S. Liu, F.-L. Huang, Y.-S. Chang and T.-B. Lo 105–114

The effect of caldesmon on dynamic properties of F-actin alone and bound to heavy meromyosin and/or tropomyosin
B. Gałązkiewicz, J. Belágyi and R. Dąbrowska 233–238

Specificity of *Bacillus thuringiensis* δ-endotoxins — Importance of specific receptors on the brush border membrane of the mid-gut of target insects
J. Van Rie, S. Jansens, H. Höfte, D. Degheele and H. Van Mellaert 239–247

Evolutionary relationships among aminotransferases — Tyrosine aminotransferase, histidinol-phosphate aminotransferase, and aspartate aminotransferase are homologous proteins
P. K. Mehta, T. I. Hale and P. Christen 249–253

Protein–protein interactions in microsomal cytochrome *P*-450 isozyme LM2 and their effect on substrate binding
P. Hildebrandt, H. Garda, A. Stier, G. I. Bachmanova, I. P. Kanaeva and A. I. Archakov 383–388

Short-chain basement membrane collagen — Further characterization and its biosynthesis by F-9 embryonal carcinoma cells
S. N. Dixit 411–414

Crosslinking of cytochrome *c* and cytochrome b_5 with a water-soluble carbodiimide — Reaction conditions, product analysis and critique of the technique
M. R. Mauk and A. G. Mauk 473–486

Purification and isolation of choline acetyltransferase from the electric organ of *Torpedo marmorata* by affinity chromatography
A. J. Raeber, G. Riggio and P. G. Waser 487–492

Variability within mammalian sorbitol dehydrogenases — The primary structure of the human liver enzyme
C. Karlsson, W. Maret, D. S. Auld, J.-O. Höög and H. Jörnvall 543–550

Glucose-6-phosphate dehydrogenase — Characteristics revealed by the rat liver enzyme structure
J. Jeffery, J. Barros-Söderling, L. Murray, I. Wood, R. Hansen, B. Szepesi and H. Jörnvall 551–556

Thiol-directed immobilization of recombinant IgG-binding receptors
C. Ljungquist, B. Jansson, T. Moks and M. Uhlén 557–561

Immobilization and affinity purification of recombinant proteins using histidine peptide fusions
C. Ljungquist, A. Breitholtz, H. Brink-Nilsson, T. Moks, M. Uhlén and B. Nilsson 563–569

Identification of a new heparin-binding protein localized within chick basement membranes
M. Vigny, D. Raulais, N. Puzenat, D. Duprez, M. P. Hartmann, J. C. Jeanny and Y. Courtois 733–740

Enzymology

Purification and characterization of a protease from *Xenopus* embryos
S. Miyata, Y. Yoshida and H. K. Kihara 49–54

Type I procollagen C-proteinase from mouse fibroblasts — Purification and demonstration of a 55-kDa enhancer glycoprotein
E. Kessler and R. Adar 115–121

Tissue distribution of the AMP-activated protein kinase, and lack of activation by cyclic-AMP-dependent protein kinase, studied using a specific and sensitive peptide assay
S. P. Davies, D. Carling and D. G. Hardie 123–128

Purification and characterization of the AMP-activated protein kinase — Copurification of acetyl-CoA carboxylase kinase and 3-hydroxy-3-methylglutaryl-CoA reductase kinase activities
D. Carling, P. R. Clarke, V. A. Zammit and D. G. Hardie 129–136

Expression of recombinant diaminopimelate epimerase in *Escherichia coli* — Isolation and inhibition with an irreversible inhibitor
W. Higgins, C. Tardif, C. Richaud, M. A. Krivanek and A. Cardin 137–143

A theoretical treatment of damped oscillations in the transient state kinetics of single-enzyme reactions
U. Ryde-Pettersson 145–148

Purification, characterization and immunological properties of 2,3-bisphosphoglycerate-independent phosphoglycerate mutase from maize (*Zea mays*) seeds
X. Graña, J. Ureña, D. Ludevid, J. Carreras and F. Climent 149–153

Pregnenolone synthesis from cholesterol and hydroxycholesterols by mitochondria from ovaries following the stimulation of immature rats with pregnant mare's serum gonadotropin and human choriogonadotropin
R. C. Tuckey and H. C. Atkinson 255–259

Evidence that 1,3-bisphosphoglycerate dissociation from phosphoglycerate kinase is an intrinsically rapid reaction step
J. Kvassman and G. Pettersson 261–264

Mechanism of 1,3-bisphosphoglycerate transfer from phosphoglycerate kinase to glyceraldehyde-3-phosphate dehydrogenase
J. Kvassman and G. Pettersson 265–272

Enzymatic properties of isozymes and variants of glucose dehydrogenase from *Bacillus megaterium*
T. Mitamura, I. Urabe and H. Okada 389–393

Synthetic fragments of β-casein as model substrates for liver and mammary gland casein kinases
F. Meggio, J. W. Perich, H. E. Meyer, E. Hoffmann-Posorske, D. P. W. Lennon, R. B. Johns and L. A. Pinna 459–464

Kinetics of the reaction of compound II of horseradish peroxidase with hydrogen peroxide to form compound III
S. A. Adediran and A.-M. Lambeir 571–576

Primary structure of horse serotransferrin glycans — Demonstration that heterogeneity is related to the number of glycans and to the

presence of *N*-acetylneuraminic acid and *N*-acetyl-4-*O*-acetylneuraminic acid
B. Coddeville, A. Stratil, J.-M. Wieruszeski, G. Strecker, J. Montreuil and G. Spik 583–590

Poly(A) polymerase from *Vigna unguiculata* seedlings — A bifunctional enzyme responsible for both poly(A)-polymerizing and poly(A)-hydrolyzing activities
Y. Tarui and T. Minamikawa 591–596

Carbohydrates, lipids and other natural products

Rapid intramolecular turnover of N-linked glycans in plasma membrane glycoproteins — Extension of intramolecular turnover to the core sugars in plasma membrane glycoproteins of hepatoma
R. Tauber, C.-S. Park, A. Becker, R. Geyer and W. Reutter 55– 62

Occurrence of free and esterified lipoxygenase products in leaves of *Glechoma hederacea* L. and other Labiatae
H. Kühn, R. Wiesner, L. Alder and T. Schewe 155–162

Carbohydrate structure of recombinant human uterine tissue plasminogen activator expressed in mouse epithelial cells
G. Pfeiffer, M. Schmidt, K.-H. Strube and R. Geyer 273–286

Metabolism of free sphingoid bases in murine tissues and in cultured human fibroblasts
T. Kobayashi, N. Shinnoh and I. Goto 493–499

Characterisation by mass spectrometry and 500-MHz proton nuclear magnetic resonance spectroscopy of penta- and hexasaccharide chains of human foetal gastrointestinal mucins (meconium glycoproteins)
E. F. Hounsell, A. M. Lawson, M. S. Stoll, D. P. Kane, G. C. Cashmore, R. A. Carruthers, J. Feeney and T. Feizi 597–610

O-specific polysaccharides of *Hafnia alvei* lipopolysaccharides isolated from two serologically related strains: ATCC 13337 and 1187 — A serological and structural study using chemical methods, gas chromatography/mass spectrometry and NMR spectroscopy at 500 MHz
A. Gamian, E. Romanowska, H. J. Opferkuch, M. Hauck and J. Dabrowski 611–620

Effects of lipopolysaccharide chemotype structure on binding and inactivation of hen egg lysozyme
N. Ohno and D. C. Morrison 621–627

Lipopolysaccharide interactions with lysozyme differentially affect lipopolysaccharide immunostimulatory activity
N. Ohno and D. C. Morrison 629–636

Effect of glycosylation inhibitors on the structure and function of the murine transferrin receptor
J. E. Ralton, H. J. Jackson, M. Zanoni and P. A. Gleeson 637–647

Distribution analyses of chain substituents of lipoteichoic acids by chemical degradation
J. Schurek and W. Fischer 649–655

Identification of phenolyl cobamide from the homoacetogenic bacterium *Sporomusa ovata*
E. Stupperich, H. J. Eisinger and B. Kräutler 657–661

Physical and inorganic biochemistry

Real-time continuous-flow spin trapping of hydroxyl free radical in the ischemic and post-ischemic myocardium
S. Pietri, M. Culcasi and P. J. Cozzone 163–173

^{13}C and ^{15}N-NMR and time-resolved fluorescence depolarization study of bovine carbonic anhydrase—4-methylbenzenesulfonamide complex
J. Jarvet, A. Olivson, Ü. Mets, M. Pooga, R. Aguraiuja and E. Lippmaa 287–290

Resonance Raman study on the structure of the active sites of microsomal cytochrome *P*-450 isozymes LM2 and LM4
P. Hildebrandt, R. Greinert, A. Stier and H. Taniguchi 291–302

Lateral diffusion of phospholipids in the lipid surface of human low-density lipoprotein measured with a pyrenyl phospholipid probe
M. Vauhkonen, M. Sassaroli, P. Somerharju and J. Eisinger 465–471

Structure dynamics of the hemoglobin mutants Hb Hôtel Dieu, HbG Philadelphia, HbJ Mexico, Hb St. Mandé and Hb San Diego, studied by nanosecond-laser-flash photolysis
M.-P. Fontaine, L. Lindqvist, Y. Blouquit and J. Rosa 663–666

Extended X-ray absorption fine structure (EXAFS) investigations of model compounds for zinc enzymes
P. Eggers-Borkenstein, S. Priggemeyer, B. Krebs, G. Henkel, U. Simonis, R. F. Pettifer, H.-F. Nolting and C. Hermes 667–675

Membranes and bioenergetics

Differential effects of α-, β- and γ-cyclodextrins on human erythrocytes
Y. Ohtani, T. Irie, K. Uekama, K. Fukunaga and J. Pitha 17– 22

Ceramic hydroxyapatite high-performance liquid chromatography of complexes membrane protein and sodium dodecylsulfate
T. Horigome, T. Hiranuma and H. Sugano 63– 69

ATP synthesis coupled to methane formation from methyl-CoM and H_2 catalyzed by vesicles of the methanogenic bacterial strain Gö1
S. Peinemann, M. Blaut and G. Gottschalk 175–180

The voltage-dependent activity of *Escherichia coli* porins in different planar bilayer reconstitutions
J. H. Lakey and F. Pattus 303–308

The sodium cycle in methanogenesis — CO_2 reduction to the formaldehyde level in methanogenic bacteria is driven by a primary electrochemical potential of Na^+ generated by formaldehyde reduction to CH_4
B. Kaesler and P. Schönheit 309–316

Dependence on membrane components of methanogenesis from methyl-CoM with formaldehyde or molecular hydrogen as electron donors
U. Deppenmeier, M. Blaut, G. Gottschalk 317–323

Supramolecular structure of lipopolysaccharide and free lipid A under physiological conditions as determined by synchrotron small-angle X-ray diffraction
U. Seydel, K. Brandenburg, M. H. J. Koch and E. T. Rietschel 325–332

Amount and turnover rate of the F_0F_1-ATPase and the stoichiometry of its inhibition by oligomycin in *Rhodospirillum rubrum* chromatophores
B. Norling, Å. Strid, C. Tourikas and P. Nyrén 333–337

Effect of ADP on the rate of acetyl phosphate hydrolysis by the Ca^{2+}-ATPase of sarcoplasmic reticulum
M. Montero-Lomeli and L. De Meis 339–342

A spin-label electron spin resonance study of the binding of mitochondrial creatine kinase to cardiolipin
D. Cheneval, E. Carafoli, G. L. Powell and D. Marsh 415–419

Growth control strength and active site of yeast plasma membrane ATPase studied by site-directed mutagenesis
F. Portillo and R. Serrano 501–507

Non-identical behavior of the Ca^{2+}-ATPase in the terminal cisternae and the longitudinal tubules fractions of sarcoplasmic reticulum
L. G. Mészáros and N. Ikemoto 677–681

Metabolism and metabolic regulation

Control-pattern analysis of metabolic pathways — Flux and concentration control in linear pathways
J.-H. S. Hofmeyer 343–354

Coenzyme specificity of mammalian liver D-glycerate dehydrogenase
E. Van Schaftingen, J.-P. Draye and F. Van Hoof 355–359

Purification and properties of the 3-deoxy-D-*arabino*-heptulosonate-7-phosphate synthase (phenylalanine-inhibitable) of *Saccharomyces cerevisiae*
G. Paravicini, T. Schmidheini and G. Braus 361–366

Dependence of the Calvin cycle activity on kinetic parameters for the interaction of non-equilibrium cycle enzymes with their substrates
G. Pettersson and U. Ryde-Pettersson 683–686

Hydroxyurea increases the phosphorylation of 3'-fluorothymidine and 3'-azidothymidine in CEM cells
A. Karlsson, P. Reichard and F. Eckstein 689–694

^{13}C-NMR study of acetate assimilation in *Thermoproteus neutrophilus*
S. Schäfer, T. Paalme, R. Vilu and G. Fuchs 695–700

Regulation of protein phosphatase-1_G from rabbit skeletal muscle — 1. Phosphorylation by cAMP-dependent protein kinase at site 2 releases catalytic subunit from the glycogen-bound holoenzyme
M. J. Hubbard and P. Cohen 701–709

Regulation of protein phosphatase-1_G from rabbit skeletal muscle — 2. Catalytic subunit translocation is a mechanism for reversible inhibition of activity toward glycogen-bound substrates
M. J. Hubbard and P. Cohen 711–716

Signal transduction and molecular neurobiology

Solubilization of somatostatin receptors in hamster pancreatic beta cells — Characterization as a glycoprotein interacting with a GTP-binding protein
J.-C. Marie, P. Cotroneo, R. de Chasseval and G. Rosselin 181–188

Identification of P_{2Y} purinoceptors associated with voltage-activated cation channels in cardiac ventricular myocytes of the rat
Ó. G. Björnsson, J. R. Monck and J. R. Williamson 395–404

Extracellular ATP stimulates poly(inositol phospholipid) hydrolysis and eicosanoid synthesis in mouse peritoneal macrophages in culture
J. Pfeilschifter, B. Thüring and F. Festa 509–513

Biochemical characterization of phospholipase D activity from human neutrophils
J. Balsinde, E. Diez, B. Fernandez and F. Mollinedo 717–724

Muscarinic acetylcholine receptor-stimulated binding of guanosine 5'-*O*-(3-thiotriphosphate) to guanine-nucleotide-binding proteins in cardiac membranes
G. Hilf, P. Gierschik and K. H. Jakobs 725–731

Molecular cell biology

Lactoferrin-binding sites at the surface of HT29-D4 cells — Comparison with transferrin
D. Roiron, M. Amouric, J. Marvaldi and C. Figarella 367–373

Direct photoaffinity labeling of leukotriene binding sites
E. Falk, M. Müller, M. Huber, D. Keppler and G. Kurz 741–747

Changes in myosin heavy chain isoforms during chronic low-frequency stimulation of rat fast hindlimb muscles — A single-fiber study
A. Termin, R. S. Staron and D. Pette 749–754

Developmental biochemistry and immunology

Gangliosides of sea urchin embryos — Their localization and participation in early development
N. D. Zvezdina, K. A. Sadykova, L. E. Martynova, N. V. Prokazova, A. T. Mikhailov, G. A. Buznikov and L. D. Bergelson 189–194

Phosphagen kinase evolution — Expression in echinoderms
A. Ratto, B. M. Shapiro and R. Christen 195–203

Developmental expression of Cu,Zn superoxide dismutase in *Xenopus* — Constant level of the enzyme in oogenesis and embryogenesis
L. Montesano, M. T. Carrì, P. Mariottini, F. Amaldi and G. Rotilio 421–426

Instructions to authors 757–761

Table of contents/Author index of volume 186 I–VIII
